**Subject:** Protect Portland's industrial jobs while protecting the river

I'm writing today because the EPA proposes a cleanup plan that commits to actions that are overly costly relative to the benefits and doesn't work for small business.

I support a thorough cleanup plan for the Willamette River but we need to be cognizant of upstream sources and the exposure risks of digging up the bottom of the river. Make sure that we get a flexible cleanup plan that works and does not create cleanup requirements just to show that EPA is demanding action.

Please support the harbor jobs that are good for our community and our economy.

Sincerely,
